Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1.   (Currently Amended) An image process system comprising:

an image display member on which an image is displayed; and

an image process apparatus, wherein:

the image display member includes a data storage unit for storing ~~data;~~ data, and

the ~~data~~ image process apparatus includes:

a image read unit for reading the displayed ~~image; and~~ image;

a data input/output unit for ~~performing at least one of~~ reading the stored ~~data and~~

~~writing another data into the data storage unit.~~ data; and

        an image process unit for synthesizing the read image with the read data.

2.   (Currently Amended) An image process apparatus comprising:

a image read unit for reading an image displayed on an image display ~~member; and~~

member;

a data input/output unit for ~~performing at least one of~~ reading data stored in a data

storage unit included in the image display ~~member and writing another data into the image~~

~~display member.~~ member; and

        an image process unit for synthesizing the read image with the read data.

3.   (Canceled)

4.   (Currently Amended) The image process apparatus according to claim 2, further comprising:

an original accumulation unit for accumulating the image display member; and

a transport unit for transporting the accumulated image display member to a position

where the displayed image is read, wherein:

the data input/output unit performs ~~the at least~~ at least one of reading the data stored in the accumulated image display member and writing another data into the accumulated image display member.

5.   (Currently Amended) The image process apparatus according to claim 4, wherein when the accumulated image display member is a plurality of image display members, the data input/output unit ~~performs the at least one~~ reads or writes the data stored in a plurality of data storage units ~~with respect~~ corresponding to the plurality of image display members.

6.   (Currently Amended) The image process apparatus according to claim 4, further comprising:

a display unit for displaying the read data, wherein:

when the image display member is accumulated at the original accumulation unit, the data input/output unit ~~performs reading~~ reads the stored data.

7.   (Currently Amended) The image process apparatus according to claim 2, further comprising:

a transport unit for transporting the accumulated image display member to a position where the displayed image is read, wherein:

the data input/output unit ~~performs the at least one~~ reads or writes the data stored in the data storage unit ~~with respect to the image~~ in the image display member being transported.

8.   (Currently Amended) The image process apparatus according to claim 2, further comprising:

a fix unit for fixing the image display member at a position where the displayed image is read, wherein:

the data input/output unit ~~performs the at least one with respect to~~ reads or writes the data stored in the data storage unit in the fixed image display member.

9.   (Currently Amended) An image process method comprising:

reading data stored in <u>a data storage unit in </u>an image display ~~member; and~~ <u>member;</u>

reading ~~image~~ <u>an image</u> displayed on the image display ~~member.~~ <u>member; and</u>

<u>   synthesizing the read image with the read data.</u>

10.   (Currently Amended) The image process method according to claim 9, further comprising:

writing another data into<u> the data storage unit in</u> the image display member.

11.   (Currently Amended) ~~A program~~<u>A computer-readable medium encoded with a computer program</u> making a computer perform a process comprising:

reading data stored in<u> a data storage unit in</u> an image display ~~member; and~~<u>member;</u>

reading ~~image~~ <u>an image</u> displayed on the image display ~~member.~~ <u>member; and</u>

<u>   synthesizing the read image with the read data.</u>

12.   (Currently Amended) The<u> computer-readable medium encoded with a computer</u> program according to claim 11, wherein the process further includes:

writing another data into<u> the data storage unit in</u> the image display member.
